## SUMMARY

---

results-driven web developer intern with 1.5 years at Global Child Prodigy. Proficient in HTML, CSS, JavaScript ,AngularJS, MySQL, Node.js, and Java, collaborative spirit, and a commitment to exceptional results.

## EDUCATION

---

**Smt. Kashibai Navale College of Engineering**  
Bachelor of Engineering in Computer Technology, CGPA: 9.2

Pune, India  
Expected Jun 2024

## WORK EXPERIENCE

---

### Global Child Prodigy Award PVT.LTD

Remote

Full-Stack Developer Intern

Feb 2022 – Present

- Developed engaging web applications using AngularJS and Firebase, contributing significantly during a 1.5-year internship.
- Demonstrated expertise in front-end development, back-end integration, and troubleshooting.
- Resolved 250+ bugs, improved code efficiency by 80 perc, and integrated Jitsi for online meetings in the meet.worktez Project.
- TechStack- [Angular-JS, Node-JS, Firebase, Bootstrap, TypeScript, Javascript ]

### Appscms Technologies PVT.LTD

Remote

Software Developer Intern

Jun 2022 – Aug 2022

- Played a pivotal role in developing online chart and graph functionalities using Advanced JS and Jekyll during a 3-month internship.
- Enhanced functionality and user experience, resolving 150+ bugs and improving code efficiency by 70 perc.
- Developed and integrated features that drove a 20 percent boost in user engagement.
- TechStack- [HTML,CSS, Advanced JavaScript, Bootstrap, jekyll]

## UNIVERSITY PROJECTS

---

### CAFÉ MANAGEMENT SYSTEM | [ Angular-JS, Node-JS, MySQL]

Jun 2023

- Developed a personal project using AngularJS, MySQL, and Node.js to design and implement a comprehensive system for managing cafe operations.
- Designed a visually appealing and intuitive front-end interface, providing users a seamless experience during system navigation and interaction.
- Efficiently handled data operations including storage, retrieval, and updates in MySQL, resulting in heightened system performance and reliability.

### NEW WEBSITE | [ React-JS, Rapid API]

Feb 2023

- Developed a ReactJS and RapidAPI powered news website for latest news access.
- Implemented filtering, search, and bookmarking for personalized news consumption.
- Utilized React's components for a responsive UI, integrating RapidAPI for real-time news. Designed an intuitive interface ensuring seamless browsing and interaction.

## SKILLS

---

**Core:** Data Structure And Algorithms, Object Oriented Programming, CNS, Database Management System.

**Languages/DataBase:** Java, C++, JavaScript, HTML/CSS, MySQL, MongoDB.

**Libraries/Frameworks:** Angular, React, Bootstrap.

## Achievements and Extra Curricular Activities

---

- Solved 500+ questions based on Data Structure and Algorithm on various Coding Platforms..
- Team Leader at Meet.Worktez Project.
- Actively contributed to open-source projects by submitting impactful pull requests, showcasing adept Git skills and a collaborative spirit.
- Participated in Google Summer of Code (GSOC) 2022, contributing to Rocket.Chat.
